

February 2023 DynaTension Special

For the month February DynaTension is running a special on the P1000 DynaTension meter ending February 28, 2023. Regular price \$5,250.00

Special includes:
P1000 DynaTension Meter
Both: VARI-L 101 Sensor / ACSSENS 103 Sensor
Charging cable / Carrying case
Calibration sheet / Manual
Shipping included

Call: 713-675-1180
For: \$4,950

DynaTension meters are user friendly

1. Enter the weight per foot of the material to be measured on the key pad.
2. Enter the length in inches between your selected fixed points.

3. Position sensor parallel and near the cable. With other hand, tap cable.
4. DynaTension meter will show an accurate tension reading in seconds.

We offer two types of sensors

Variable Inductance Sensor 5-1/2" x 1" x 1"

VARI-L 101 Sensor

Designed for use with material on long spans under low tension. Uses low frequency bandwidth (1 Hz).

Acceleration Sensor 1-1/4" x 1/2" x 1/2"

ACSSENS 103 Sensor

A magnetic contact probe for hands-free measurement of short spans under high tension.

P1000 DynaTension Specifications

DynaTension P1000 includes preprogrammed meter, canvas field case with storage compartment, Velcro closures, shoulder strap, charger, and choice of sensor.

	Height	Width	Depth	Weight	Span Length
P1000 DynaTension	4.0 inches	10.5 inch	9.25 inches	5.0 lbs	0.5 ft to 328.0 ft
	10.2 cm	26.7 cm	23.5 cm	2.3 kg	0.15 m to 99.9 m

Power Source	6 volt rechargeable battery with charger
Operating temperature range	-4°F to 150°F -20.0°C to 65.6°C
Tension/overall range	0.001 to 9,999,000 lbs 0.000028 to 28288.68 kg
Tension/span per range	<1% to >100% of breaking strength
Resolution	0.01%
Accuracy	+1%
Repeatability	within 0.5%
Cable weight	unlimited to 99.99 lbs/ft
Calibrated	to E-4, traceable to NIST
DynaTension – tested and field proven. U.S. patent number - 4565099
